New York, 1991.

A.B. in Economics, minor in Mathematics, Occidental College, Los Angeles, California,
1987. Graduated cum laude.

Dissertation:

"Does the wage structure depend on the wage contract? A study of public sector wage contracts in Iceland", Committee Chairman: John Abowd, Completion Date: October 2009.

Current research:

Currently I am developing further topics from my dissertation. In my dissertation I studied wages within the public sector in Iceland and applied the theory of unions to wage data to determine the efficiency of collective bargaining in the public sector in Iceland. I am also working on a project looking at the gender effects of the economic crisis, both the causes of the crisis and the effects of the crisis. Furthermore, I am involved in a European research project entitled the Role and Impact of Labour Taxation.
