

Applied Project 1-3

E-710-APP1, E-810-APP2 and E-811-APP3

6 ECTS (each course)

The primary goal is for the students to acquire the skills on the relevant BCBA task list as well as the skills necessary to interact effectively with consumers, supervisors, families, and others. All students will complete three semesters where they obtain hands-on experience implementing the methods of applied behaviour analysis. Students will work in a clinical setting in which the implementation of behaviour-analytic principles are evidenced. In addition, students attend weekly on-campus group supervision meetings.

Teaching Methods:

Students will receive feedback when implementing methods they learn throughout the course of the program.

Learning Outcomes

At the end of the semester students will be able to:

Competence:

- Demonstrate competence in applying the skills and knowledge of the methods of applied behaviour analysis in a clinical setting.

Assessment: Diary, applied project report, attendance.
