

## **Ethics**

### **E-704-ETHI**

**4 ECTS (30 hours)**

In this course students will examine the professional and ethical compliance code for behaviour analysts. Students will learn about responsible conduct of behaviour analysts, behaviour analysts' responsibility to clients, behaviour analysts ethical responsibility to the profession of behaviour analysis, behaviour analysts' ethical responsibilities to colleagues, and ethical responsibilities to the BACB. In addition, students will learn about ethical guidelines when assessing behaviour, when deciding on behaviour change programs, as supervisors, and when conducting research.

#### **Teaching Methods:**

Lectures, in-class individual and group activities.

#### **Learning Outcomes**

At the end of the semester students will be able to:

#### **Knowledge:**

- Demonstrate detailed knowledge of the ethical compliance code for behaviour analysts.

#### **Skills:**

- Identify ethical dilemmas and ethical compliance codes relevant to each dilemma.

#### **Competence:**

- Discriminate and identify the ethical responsibilities of behaviour analysts towards their clients, other professionals and the BACB.

**Assessment:** Ethical dilemmas, presentations, discussion questions.
